

A P P E N D I X II:

SCHEMATIC ILLUSTRATIONS:

- 1) Schematic illustration of the apparatus of Claims 1, 2 and 4 to 8
- 2) Schematic illustration of the apparatus of Claim 3

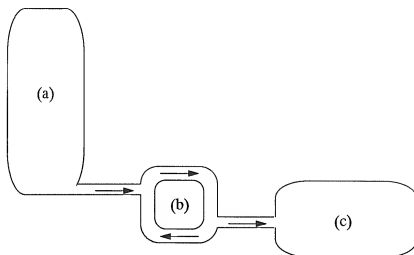

Legend:

- a) Reactor suitable for batchwise preparation of a melt of a thermoplastic polymer from monomers which form such a polymer
- b) Piping system comprising a pipe which forms a circuit and which is suitable as circulation line for the melt of the thermoplastic polymer
- c) Apparatus suitable for the production of shaped bodies from the melt of the thermoplastic polymer, e.g., a granulator, a spinning apparatus or an apparatus for producing a film

→ Direction of melt flow
